DETAILED ACTION

1. This action is responsive to communication filed 7/5/06.

Response to Amendment

2. Examiner acknowledges the cancellation of claims 11 and 17.

Allowable Subject Matter

3. The indicated allowability of claims 1-6 and 19-24 is withdrawn in view of the newly discovered reference(s) to Chamberlain (6,980,692). Rejections based on the newly cited reference(s) follow.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 2624

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-10, 12-16 and 18-24 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,980,692. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims in the instant application are broader than patent claims.

Mapping claim 1 of the patent '692 with claim 1 of the instant application.

Chamberlain '692 discloses,

A picker assembly (col. 8 line 5),

Illumination source disposed on picker assembly (col. 8 line 7)

An imager disposed on the picker assembly (col. 8 line 6)

A processor coupled to the imager and illumination source for processing the imager and controlling the illumination source (col. 8 lines 8-10)

Wherein the processor uses bounding boxes to identify the location of desired physical feature in the threshold image (note col. 8 lines 11-24, processor identifies the region of interest around the area where desired physical feature is expected to be thresholded, examiner interprets a reading on the claims).

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2624

7. Claims 7 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 recites the limitation "the thresholded image" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Claim 13 recites the limitation "the thresholded image" in line 8. There is insufficient antecedent basis for this limitation in the claim.
